gvw_D evvJj m (Matthew Battles)-Gi gtZ, Much of western book culture owes its heritage to Islam. To the Greeks and the Romans, books had been tools, utilitarian repositories of knowledge. The phers and illustrators of Islam, by contrast, made the book it self a thing of beauty and collectors came to value the sumptuous look and feel of books as much as the writing they conveyed.⁷⁴

Cordova was more then the seat of a powerfull and prosperous empire. It was also, in the words of Ash-Shaquandi, “The centre of learning, the beacon of religion, the above of nobility and leadership; its inhabitants had deep respect for the low and set themselves the task of mastering this science, the kings humbled themselves before the doctor, exalting their calling and acting in accordance with there opinions.”¹¹⁰
